Ediwin Viewer

The Web EDI Solution from Edicom

About ✓

EDIWIN VIEWER is a low-cost, high-reliability solution for cloud-based B2B electronic data interchange. It has different EDI implementation models, based on the volume of transactions to exchange with your business partners.

For low transaction volumes, Edicom enables low-cost models that are quick and easy to install for sending and receiving messages through web interfaces. These are non-integrated systems which enable access to the EDICOM B2B Cloud Platform, where users can run their EDI application to administer the exchange of business documentation with their community of business partners.

Ediwin Viewer : A solution developed by Edicom

EDIWIN VIEWER is the Web EDI software developed by Edicom that allows a fluid and secure exchange of all types of electronic documents, including invoices, orders, delivery notices, etc.

EDIWIN VIEWER is a low-cost, high-performance solution that is quick and easy to install and which will allow you to interact with all of your clients and suppliers online.

Features ✓

- **Edit screens:** The edit screens enable multiple editable forms for processing invoices, shipping notices, orders, etc.
- **Logistics labeling:** Allows users to create barcode labels to identify shipments from delivery notes.
- **Error validation:** Provides control systems to guarantee that messages are properly constructed (all obligatory information to provide, message structure, identification of logical location numbers, etc.).
- **Automated message construction:** Implements automated processes to generate shipping notices and invoices using data from orders received, eliminating the need to enter all of the information manually.
- **Electronic signature of documents:** Supports multiple e-signature systems, making it perfectly suited to global projects which are billed online.
- **Multi-standard:** Can process incoming and outgoing multi-format data structures including EDIFACT, X12, XML, ODETTE, UBL, FACTURAE, etc.
- **GDSN catalog management:** Includes specific edit screens for managing publication and subscription processes for items on the GDSN network using EdicomData.

The Web EDI Solution from Edicom

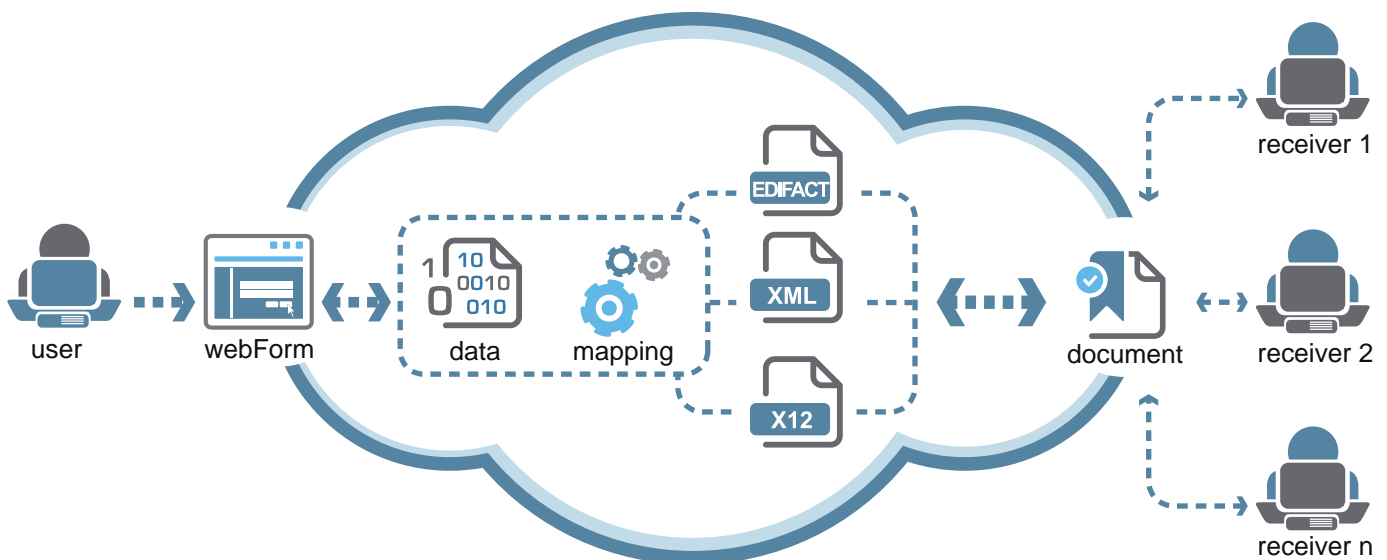

How it works ✓

EDIWIN VIEWER is available via Edicom's technology platform. The solution can be accessed via the internet with the databases, communications, and hardware and software resources managed in our own facilities.

Messages can be constructed easily using simple online forms which are both versatile and fully intuitive. Documents such as invoices and shipment notices are entered directly by the user, and our system adapts them to the right standard at the time so they reach their destination correctly.

Transparent connection

- Users access their work environment online.
- Users can semiautomatically draft the messages they want to share: **shipment notices, invoices, orders, etc.**
- **The Edicom platform** converts messages to the standard required by the recipient.
- Messages sent by the recipient are received by Edicom and made available to the user, who can manage messages stored on the website.

EDIWIN VIEWER is updated regularly in Edicom's technology infrastructure. The most recent update was developed in JAVA and is administered via our database to make the system more robust.

The Web EDI Solution from Edicom

Benefits ✓

- **A low-cost solution that is quick and easy to install:** EDIWIN VIEWER is a low-cost solution that can be set up and put to use very quickly since it requires no investment in software or hardware or modifications to your company's computer systems.
- **Updates:** EDIWIN VIEWER is an Application Service Provider - Software as a Service (ASP-SaaS) solution, so you don't have to worry about updates or new versions. Edicom guarantees that the application will be upgraded and updated on a constant basis.
- **High availability:** You only need an internet connection to access and manage your messages. The work environment can be accessed with a web browser at any time of the day and from anywhere in the world.
- **Edicom support:** Contracting an EDIWIN VIEWER solution gives automatic access to Edicom client support, with more than 100 technicians to answer your questions and respond to incidents.
- **Secure storage of invoices in accordance with the law:** Invoices sent or received via EDIWIN VIEWER are stored securely and in accordance with current legislation for the period which they are required to be kept by law. This means there is no need to print them and keep physical records, and documents can be located and viewed immediately whenever you or a third party need to.
- **Control sobre sus transacciones electrónicas:** Los mensajes enviados desde EDIWIN VIEWER tienen registro de trazabilidad, lo que le permite saber en todo momento el estado de los documentos.
- **Automatic solution:** Our automatic document generator shortens the time required to create documents by using data from the orders you receive.
